

Usability Test - Create a Case - Petitioners (May 2020)

Purpose

- Validate Create Case form redesign meets user needs as discovered during [Petitioner Usability Testing - OCT 2019](#)

Research Questions

Registration

- Is the user able to register for an EF-CMS account and login to the system?
- Does the account registration process meet user expectations?

Dashboard

- Does the user understand the content as presented?
- Does the user have any doubts about what they need to do to proceed with the petition and other associated documents?
- Does the user understand what is required of them and what to expect from the Court during the petition process?
- How confident and comfortable are users in beginning the petition process?
- Does the user understand that there is a filing fee? Does the user know what payment options they have?

Create a Case/File a Petition

- Are users able to understand what forms to complete for each document, and how and where to upload those documents?
- After reading the instructions can the user clearly state what documents they will need to proceed with the petition and how and where to upload those documents?
- Does the user understand when to redact their PII, and when to include it (STIN)?
- Can the user easily complete the form wizard?
- How confident are users to submit their completed form to the Court?

Post-Submission: Next Steps

- What are user expectations after they submit the petition? Do they understand what will happen next?

Participant Recruitment

Recruit in sprint 41.

Target number of users to be tested = 12

Who are the petitioner test subjects?

- Age (target 4 participants in each range)
 - 18-39
 - 40-65
 - Over 65
- Location (target 3 participants in each range)
 - EST
 - CST
 - MT
 - PST
- Knowledge to the process
 - Never filed a petition before
 - Have filed before (target 3 participants)

Recruitment letter for social media.

I'm looking for a few volunteers to help a team at work improve a government website to make sure it works well for the public who'll be using it. It would only take 30 minutes and can be done virtually (so doesn't matter where you live). You'll be using the website to file a fake petition contesting your taxes to the United States Tax Court. If you've actually done this in real life, even better!

If you're interested and over 18 years of age, contact Kristen Lohman at klohman@flexion.us

Testing Environment

Browsers: User's preferred/default browser

(Target: Chrome, Internet Explorer, Safari, Firefox)

Scenarios / Tasks

Scenarios

Scenario A: You are a business owner and have received a Notice of Deficiency for \$14,000 from the IRS. You want to file a petition online with the U.S. Tax Court to dispute the amount owed.

Scenario B: You received a Notice of Deficiency for \$59,000 from the IRS saying you and your spouse owe for previous taxes. You want to file a petition online with the U.S. Tax Court to dispute the amount owed.

Scenario C: You've received a Collection (Lien/Levy) notice from the IRS for \$29,000, and want to petition the Tax Court to dispute the taxes due. You've already prepared a written petition and scanned it into your computer as a PDF.

Task 1: Register for an account as a petitioner with the USTC EF-CMS

<i>Research question</i>	• Is the user able to register for an EF-CMS account and login to the system? • Does the account registration process meet user expectations?
<i>Inputs</i>	User email address
<i>Observations</i>	• How easily can the user locate the way to register for an account? • Does the registration form include all the expected information? • What does the user expect after completing registration? • Does the user know what to do next?
<i>Success Criteria</i>	User registers for an EF-CMS account with their email address

Task 2: Login to the EF-CMS and prepare to file the petition

<i>Research question</i>	• Does the user understand the content as presented? • Does the user have any doubts about what they need to do to proceed with the petition and other associated documents? • How confident and comfortable are users in beginning the petition process? • Does the user understand that there is a filing fee? Does the user know what payment options they have?
<i>Inputs</i>	Login <user email> + <password>
<i>Observations</i>	• What is the user's reaction to the dashboard? Is this the information expected on login? • Does the user understand what forms are needed to complete the Petition? • Does the user locate and download the forms? How easy or difficult does the user find this?
<i>Success Criteria</i>	• User successfully logs into system • User understands what forms are needed for the Petition process • User downloads and saves required forms to their device

Task 3: Complete and Upload the STIN and Petition forms

<i>Research question</i>	• Are users able to understand what forms to complete for each document, and how and where to upload those documents? • After reading the instructions can the user clearly state what documents they will need to proceed with the petition and how and where to upload those documents? • Does the user understand when to redact their PII, and when to include it (STIN)?
<i>Inputs</i>	• STIN form PDF (saved to user device) • Petition form PDF (saved to user device)
<i>Observations</i>	• How did the user obtain the STIN form? • Did the user know to include their SSN on the STIN form? • How did the user obtain the Petition form? • Is the user able to merge the Petition form and IRS Notice? • Did the user know to redact their PII on the Petition?

	Does the user recognize when they have successfully uploaded the document? Are they able to see that they have uploaded the correct PDF?
<i>Success Criteria</i>	User upload STIN form to STIN filed User uploads redacted Petition form to Petition field

Task 4: Complete and submit the online Petition form

<i>Research question</i>	- Can the user easily complete the form wizard? - How confident are users to submit their completed form to the Court? - What are user expectations after they submit the petition? Do they understand what will happen next?
<i>Inputs</i>	Scenario A: - Ownership Disclosure PDF Scenario A, B, C - Petitioner information <any>
<i>Observations</i>	- Did the user select the correct radio button for who they are filling for? Did they second guess themselves? Were they quick to select or take a moment to decide? - Did the user select the case/notice they received, if received one? If they did not receive did they choose the correct case/notice for the petition they are filing? - Is the user able to select the appropriate case procedure? Do they understand the difference and pros/cons of each procedure type? - What is the user impression of the Review screen? Is this helpful to them? - What is the user impression of the Confirmation modal? Is there information missing that the user expects to see here? - What questions does the user have regarding next steps?
<i>Success Criteria</i>	User submits form successfully User is able to navigate back to case from their Dashboard

Follow Up Questions

- How often do you fill out forms online?
- How likely would you be to complete this Petition form online?
