

# Usability Test - Petitions Clerk

## Purpose

---

Validate the usability of the core system functionality for the petitions clerk role

- Document QC Navigation and Workflow
- Messages Navigation and Workflow
- Paper Petition Workflow
- Petition QC Workflow
- Recall Workflow

## Prior Research

---

Petition Clerk - QC Design Feedback - FEB 2019

Petition QC Usability Test - Petitions Clerks - MAR 2019 [Washington DC]

- [https://drive.google.com/open?id=1a3el4zIM0P\\_sXDZXt75-krHRBW92XVAn24etA0tcCDE](https://drive.google.com/open?id=1a3el4zIM0P_sXDZXt75-krHRBW92XVAn24etA0tcCDE)

## Goals / Questions

---

Document QC Navigation and Workflow

- Can the user navigate easily through the Document QC boxes?
- Can the user easily determine the status of petitions in the QC box?
- Can the user assign petition work items? Can they determine which items are assigned to them?

Messages Navigation and Workflow

- Can the user navigate easily through the Messages boxes?
- Can the user easily determine and locate new messages?
- Can the user easily send a message to another court user?
- Can the user easily forward a message to another court user?
- Can the user easily locate previously sent messages?

Paper Petition Workflow

- Does the user understand how to create a new case?
- Does the form contain all expected data points? Are they organized logically and fit with the user's process?
- Does the user understand how to add a document and add multiple documents?
- Is the user able to easily understand and use the scanning interface?

### Petition QC Workflow

- Can the user understand and navigate through the QC dual panel layout?
- Can the user navigate the Document Info tabs?
- Does the QC form contain all the expected data points?
- Can the user determine what to do next in the QC process?
- Do user expectations of what happens when a petition is “served” match the system functionality?

### Recall Workflow

- Can the user locate petitions that have been batched?
- Can the user easily determine how to recall a petition that has been batched?
- Do user expectations of what happens on “recall” match the system functionality?
- Can the user easily determine which petitions have been recalled?
- Can the user determine what to do next after a petition has been recalled?

## Testing Environment

---

Browser: Chrome

Staging Site

## Scenarios / Tasks

---

*Scenario 1 - You just arrived and log in to the system for the first time in the morning. You need to start working on the new petitions.*

Tasks:

1. Login to system and see how many new petitions have arrived for the Petitions Section.
2. Assign the 5 oldest petitions to yourself.
3. View how many petitions are assigned to you.

|                |                                                                                                                                                                                                                                      |
|----------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Goal           | Can the user navigate easily through the Document QC boxes?<br>Can the user easily determine the status of petitions in the QC box?<br>Can the user assign petition work items? Can they determine which items are assigned to them? |
| Starting Point | Log in screen                                                                                                                                                                                                                        |
| Required Data  | 20 petitions NEW status<br>2 petitions assigned to [petitionsclerk1]<br>2 petitions assigned to [petitionsclerk2]<br>2 petitions assigned to [petitionsclerk3]                                                                       |

| Observation Notes |
|-------------------|
|                   |

*Scenario 2: You are waiting for a response to a question you sent to a Senior Attorney regarding [docket XX]. After you receive it, you'll want to inform Judge Buch that the issue has been resolved.*

Tasks:

Check if you have received a response in the system from the Senior Attorney regarding the petition for [docket XX].

View the message from the Senior Attorney

Forward the Senior Attorney's message to Judge Buch with your own note.

Find the last message you sent.

| Observation Notes |
|-------------------|
|                   |

*Scenario 3: It's Monday morning, and you received a paper petition in the mail, stamped received on Friday, September 13, 2019. You need to add this petition in the system.*

Tasks:

1. Locate where to add a paper petition into the system.
2. Enter in the paper petition details.
3. Add all documents received with the petition into the system.
4. Submit

|                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |

*Scenario 5: Your supervisor has asked for you to correct the case type to Partnership (Section 6228) to a petition that is batched for the IRS.*

Tasks:

1. Locate the petition [case #]
2. Correct the case type.
3. Complete the QC process.
